CHAPTER ONE HELLO MR. ROBOT

Time passed, The Twins were now 16 years old.
All had been pretty quiet for some time.
They were starting to get restless and looking for something to do.

It was Friday, early in the afternoon.
An alert came over the police radio.
The main bank of down town New York City was being held up.
They had the place surrounded and there was no way that anyone could get away.

However things are not always as they seem to be.
Inside the bank five strange figures move about collecting all the money, twenties and up.
The president of the bank closed the door to the safe. One of the strange robbers grabbed the safe door and ripped it off like it was paper.
They gathered all of the money then headed for the door.

Omega said, "Do you think we should check it out Alfa?"
"No it sounds like they have things under control."
"Yes you're right, after all we did promise the Mayor that we would only interfere when we were asked to do so."

Then they heard someone say, "Well looks like they are giving up, they're coming out.
What the hell is that? I've never seen anything like it."

Then they heard something that sounded like it came from a science fiction movie.
My God the voice said, it just Disintegrated two police cars and the men that were behind them.
Then all kind of gunfire and screaming.

“Come on Omega we are needed there whether we are invited or not.”
They both suited up and started flying to New York City.
The flight took them about fifteen minutes, the place looked like a war zone.

Buildings were burning.
You could see on the blacktop where the police cars had been sitting.
Emergency vehicles were starting to arrive to help the people.

Alfa and Omega landed and went over to one of the policeman to ask what happened.
The policeman said he had never seen anything like it.
There was five of them and bullets didn't hurt them.
Just look around, over twenty cars and at least a hundred people gone.
They talked to more people and got the same story.

Then they took flight to see if they could find them.
However there was not a trace of them anywhere.

They decided to stay at the New York Apartment for a while so they would be close to the action.
When they got there they called their mother to tell her where they were.
Then they called the chief of Police to tell him where to reach them.

They turned the TB on to see what the news was saying.
Someone had got some pictures of the bank robbers.
Omega said, “They look like robots.”
Alfa said “Yes, or maybe androids”

“What are you thinking Alfa?
Surely you don't think Ed could have lived through that falling building?”.
“ You may be right Omega but I have this funny feeling in my bones.

No matter what he gets into The seams to always come out of it alive and he is a very smart man.
”

“ Yes but he always uses his whit for bad and not good.”

“ Yes you are right, what a shame he could do so much for mankind.”

“ Here we are talking about Ed and we are not even sure it was him.”

“ Well one thing is for sure Omega, whoever it is they won't stop with just one bank. People like that just never seem to get enough.”

“ You are right and we will be here to take them on when they try it.”

“ Tell me Omega, Have you tried your eye beam on anything that it can't cut through?”

“ No, it has cut or melted anything that I use it on. “

When we go up against these things you try to go for the arm that has the weapon in it.”

Also stay close to me so I can shield you. We have seen the power of their weapons you know.”

“ Adam how do you know your shield will stop those weapons?”

“ I don't but it's all we have.”

“We have one other thing Alfa.”

“ What's that Omega?”

“Speed, we have speed.”

“ Hay girl, I think you have something there, we move in fast, hit them hard, then move out and come in from another direction.”

CHAPTER TWO
HERE THEY COME AGAIN

Then came a message on the television.
We have a special news bulletin.
When the picture came on there stood one of the robots.
In a hard rough voice he said” I Am The Destroyer. I am here to take over your puny little planet.
If you try to resist I will destroy you. Your weapons can’t hurt me or my followers. Today you saw what we can do so if you wish to live you will lay down your weapons and submit to me.

After he finished talking the reporter came on the TV screen and said.
“ Alfa and Omega where are you when we need you?”
Alfa said,” Something smells fishy in this pond.”
“What do you mean Alfa?”
“ I mean if they are here to take over the world then what do they need with money.?”
“ Yes, I see what you mean.
So what do you think they got the money for?”
“I mean I think someone else is in charge and not the destroyer.”

Alfa called the police and had him deliver some video of the robots.
They wanted to see them in action.
They put the video’s in and watched them.
Adam said,” Look the weapon is on the back of the hand.

Just then the phone rang and on the other end was the Police chief.
He said.” Alfa is that you?”
“ Yes it is.”
“ The robots are crossing the Brooklyn Bridge.
“ Thank you sir we will take care of it.”
Alfa said” OK sis let’s make short work of these ten cans.
“ Let’s go Brother.
Out the window they flew.

People had gotten out of their cars and were running to get off of the bridge.

There were five robots walking single file.
Each about one hundred yards behind the other.
Alfa and Omega flew around to come up behind the last robot.
Using levitation he picked up the last robot took him high in the air and slammed him into the pavement.

The robot got up and held out his hand to fire at them but when he did they were under the bridge.

“ Well they are tough old boys aren’t they.” Aid Alfa.
Omega said,” Give me a shot at him then try that again.

“ You got it Sis.”

They flew over again and Omega used her eye beam in a two second blast.

“ Now Alfa,” she shouted.

Alfa levitated the robot again and slammed him into the pavement.

The robot got to his feet and held out his arm to fire at them.

When he did he disintegrated himself.

“ Wow,” Said Adam What did you do?”

“I melted the end of his weapons closed and it backfired on him.”

“ That was great sis, one down and four to go.

Omega said,” I wonder if they can swim

“ I don’t know, let’s find out.”

Adam Levitated the next robot and dropped him into the water.

At that time the lead robot turned and fired his weapon at Adam.

Adam saw him but only had time to activate his force field.

It stop the blast.

They went below the bridge again.

They could hear the robot say, whoever you are come out and fight and I will destroy you.

Adam said “ I will distract them and you use your eyebeam on their weapon arm then we’ll let them take a swim.”

Adam flew under the bridge and up so the robots could see him.

They fired at him but he was too fast for them.
Omega came up on the other side of the bribe.
She used her eyebeam to cut off the hand of one of the robots.
Then she levitated him and threw him into the water.

“ Only two to go.” She thought.
She took aim on the other robot and cut off his head, it fell to the pavement.
Fire shot out of the robot’s neck.
She then levitated it and threw it into the water.
At that moment the last robot the one that called himself the destroyer vanished as if into thin air.

Omega said, “ Alfa did you see that?”
“ Yes I saw it, I wonder how he did that.”
“ I don’t know but I hope he doesn’t come back.”
Well if he does we know how to handle him .

CHAPTER THREE

A NEW TWIST

Let's go back to the apartment, I want to stay in New York for a few days just to make sure."

They flew away and went back to the apartment.

Most of the activity was on the news that evening.

Omega said," Alfa do you still think ed is mixed up in this?"

I don't know if even Ed can make something disappear like that.

" How do you think he did that?"

"Could have been some kind of time warp or something like that.

" Do you think he will be back?"

" If he does he will probably bring reinforcements."

Days passed then turned into weeks the twins had returned home and all was quiet on the home front.

Then one morning they were eating breakfast and watching the TV.

A news report came on the TB.

The reporter was shouting into the mike.

" I don't know where they came from but there are thousands of them.

They are walking through L A using those ray guns on their hand.

The police have tried to stop them but bullets can't hurt them.

The military has intercepted them but nothing seems to stop them.

Most of the Army has been destroyed and they shoot down every plane that comes near them.

We need help but for the life of me I don't know where we will get it.

This is a full scale invasion folks.

You are advised to run for your lives.

Alfa said," Suet up girl we have a long trip ahead of us."

I'll be ready in a flash."

In a short time the twins were on their way to California.

Flying as fast as they could under Alfa's protective shield it took them two hours.

They flew very high so they would not be detected by the robots.

L A was on fire, there was destruction everywhere they went.
 Adam said, "It looks like we made him mad the last time."
 "Well Alfa it's my intention to make him a lot madder this time."

Soon they could see the robots.
 "My God Alfa there are thousands of them, what will we do?"
 "How about this."
 They stopped in midair, Adam concentrated on one of the robots.

The robot turn and fired on two of the other robots and destroyed them.
 then another robots fired on him and destroyed him.
 "Adam that was fantastic, let's try it on some more."
 They both used the power of their minds to turn the robots against each other.

By the time they had crossed the mountains and started across the desert more than half of the robots had been destroyed.
 Then all of a sudden a blast hit the force field.

Alfa said, "Woops looks like we've been discovered."
 They retreated and came in from another direction.
 There was still a couple of thousands of them.
 Alfa and Omega turn them against each other and they begin to fire on one another.

They had gotten rid of about four hundred more when they were discovered again.
 When they started catching fire they withdrew again.

Alfa said "Do you know what highway this is?"
 "I'm not sure but I think it's 70."
 "It's the only road for miles that crosses the Grand Canyon."
 "So What Alfa?"
 "So it has a lot of water in it."

"Adam that's a lot of robots to throw off a bridge."
 "We'll let them all get on the bridge then crumble the bridge."
 "We could make someone mad if we destroy a bridge."

“ Maybe they would rather we let the robots get past the Grand Canyon.”
“ I see what you mean, let’s do it.
They flew ahead to the bridge.

There was plenty of water in the canyon under the bridge.
“ OK Omega you stay on this side and I’ll go to the other side. When they all get on the bridge give it all you’ve got and lets bring that bridge down.”

It took about two hours for the robots to get there.
They were marching five abreast in both east and west bound lanes.
Alfa said to Omega by Telephony.” You give me the word when they are all on the bridge.”
“ OK Alfa.”

Then Alfa saw the robots coming across the bridge.
They were almost across the bridge when Alfa heard Omega say .
”Now Alfa Now.”

They both used the force of their powers.
The bridge started to shake.
The robots stopped, they did not know what was happening.
Then the bridge started to crumble and fall into the river far below taking robots with it.
When they were finished the bridge was gone and so were the robots.

They watched the river for a while to make sure that none of them came up.
They saw no sign of them so they flew home for some well needed R&R.

CHAPTER FOUR
THINK IT'S OVER-GUESS AGAIN

Three months passed and the robots were all but forgotten.
They were sure that there would be no more robots to deal with.

Of course we know that our duo has not always been right.
It was an early September morning the twins were having breakfast .
The phone rang." Hello." Said Omega.
A voice on the other end said." Omega is that you?"

" Who is this? "She said.
" This is the Mayor of New York City, Don't you watch TB?"
" Not lately."
"Well turn it on."
" Yes I will, Thank you."
"You're welcome, good bye."

Omega picked up the remote and turned the TV on.
The Washington DC news helicopters were flying around.
The reporter said." We have no idea where it came from, it wasn't there yesterday."
They backed up to give a view of what they were talking about.

It was a statue of a robot and it was about fifty feet tall.
It was sitting on the north lawn of the White House.
Nobody knows how it got here, someone said one minute it wasn't here and the next minute it was.
Something like that would have to weigh twenty tones or more.

" What do you think about that Alfa?"
" I don't know, I hope it isn't a Trojan Horse."
" Do you think maybe we should take a look at it?"
" We can if you like Sis."
" Well I would feel a lot better if I know what it is."
" OK sis, there will be no living with you until you check this thing out, so suit up."

A short time later they arrived in Washington DC.

The helicopters were still flying around it.
 The Army was positioned all around it.
 The president and vice president had been moved to secret locations.
 Alfa and Omega landed and asked where the commanding officer was.

One of the soldiers pointed him out.
 They went over to him and said, "Sir what do you know about this thing?"
 The Commanding Officer said, "We only know that it appeared here sometimes early morning and it hasn't moved or anything."

Alfa said, "It looks just like a statue it's not metallic like the others."
 The C O said, "That was my thoughts also."
 Alfa said, "Do you mind if we try to move it, you know it could be a bomb of some kind."
 The Co said, "I can't OK that without permission from higher up."

"Well if you can contact the President I think he will OK it."
 "I'll see what I can do."
 "OK in the meantime we are going to get a closer look at this thing."

They flew up the back and Omega put her hands on it."
 "This thing is hollow she said."
 Alfa then put his hands on it, "Yes and there is some kind of vibration, I think this thing is mechanical."
 "Do You mean like the others?"
 "Yes."

They flew on up and landed on the shoulders.
 "Alfa, maybe we should fly around and find a place to put this thing."

Just then the top of its head opened like a box lid.
 They flew up and looked inside, there was nothing but an empty box.
 "I wonder what this is for Alfa."
 At that time the hand of the robot came up and knocked them both into the box and closed the lid.

"Well I think I know what this is for Omega."
 "I'm sorry I asked."
 Well let's get out of here."
 "OK I'll just cut through that lid where the latch is."

When she used her eye beam it did not do a thing to the lid.
 “Well that’s the first time that has happened.”
 “Ok sis let’s get together and levitate that lid open.”

They tried with all their mite but it did not budge.
 The robot started to move.
 The Army went on the attack and the robot just wiped them out like it was nothing.

As the robot went he destroyed anything that moved.
 All day and all night he walked and destroyed.

They tried repeatedly to force the lid open but it didn’t budge.
 “We have got to get out of here Alfa.”
 “ Well I’m open to any idea you might have.”

“There’s got to be a way Alfa I feel so stupid for falling into this trap.”
 “ Don’t be so hard on yourself sis it could happen to anyone.”
 Alfa, How strong is your force field?”
 “ I don’t know.”

“ How far can you expand it.”
 “ Hay you may have something there.”
 “ I hope it works.”
 “Stand up and get close to me.”
 They stood up and Alfa activated his force field.
 It filled the box they were in.

Alfa started expanding the force field a little at a time.
 Inch by inch he expanded the force field.
 Alfa could tell he was getting weaker.
 He told Omega to use her levitation on the lid.
 She gave a hard push with all the strength that she had left and the lid flew open. Adam said,
 Stay close to me and fly fast and they did.
 In a few seconds they were out of sight of the robot.

Alfa said,” We need food and drink then we’ll go after him.”
 They didn’t carry money but they stopped at a fast food and they were glad to give then
 something to eat and drink.

When they finished eating they signed autographs for the people that worked there and then took flight.

They caught up with the big robot and flew up behind him and picked him up.

They lay him on his back and flew him about fifty miles out into the ocean.

The water there was about three miles deep.

They dropped him into the water.

Robots don't swim. They watched him sink until he was out of sight.

Then they said well another job well done and flew home.

The end
